- Low administration time and cost
- The most advanced technology
- Easy to access and use reporting
- Integrated platform so you can add services seamlessly over time
- Professional and knowledgeable staff always ready to help
- Responsive service and support
- Customization to fit the way you conduct business

Having a single integrated platform for telecom and IT procurement is a crucial first step in any lifecycle management program.

A centralized and streamlined process for procuring or provisioning your telecom and IT devices and services is a crucial first step in your lifecycle management program. As devices and services continue to proliferate, it's never been more important to have the right tools in place to assure all orders consistently leverage the best options made available through contracted carriers and providers.

A standardized procurement process helps reduce off-contract orders, meet minimum annual contract requirements and eliminate unnecessary costs. You'll also be able to increase operational efficiencies, better plan for the future, and more effectively tie your procurement into a centralized management process for all adds, moves, changes and deletions.

IT Equipment

Circuit

Give your employees flexibility in choosing what they need, while maintaining consistency and control.

You need a solution that is easy for your employees to use, for you to manage, and yet is powerful enough to maintain consistency and control across your entire enterprise. Comview's Telecom/IT Procurement is a comprehensive, integrated provisioning solution that saves you both money and time.

A customized rules-based system.

Comview offers an intuitive interface that is easy to use, allowing employees to order devices and services that meet their individual needs. Only those devices approved for use are presented, and all rules regarding when and how devices or services can [cont. on back](#)
