- Handle carrier disputes
- Completely automate charge-backs

And with Comview's managed service, you're always assured of...

- Proactive, dedicated account management
- Low administration time and cost
- The highest reliability
- Integrated platform
- Unlimited licenses, training and support

Gain control of your enterprise mobility

As corporate mobile use continues to grow, so does the expense and complexity of managing it. Without the time, resources and expertise to effectively manage your wireless users and expenses you can easily lose track of what you have and what you are paying for. Growing data usage, shifting rate plans and the mix of BYOD and corporate-liable devices further complicate matters.

Mobility doesn't have to be complicated

Comview provides a mobile communications lifecycle management solution from procurement to inventory and wireless expense management, featuring an easy-to-use, cloud-based management and reporting portal with dedicated managed services.

Our proactive account team becomes an extension of your staff to reduce workload, optimize services and provide maximum savings.

Savings guarantee

Comview will analyze your data and provide a written savings guarantee up to 30% or more.

Information at your fingertips

The platform collects monthly invoice and usage data from every mobile carrier and integrates with your corporate feeds to provide a simple, unified view of your mobile environment. Information you need to successfully manage your mobile users is in one single database and accessible through advanced search, BI and reporting tools.

Exception reports pinpoint excessive roaming, long distance, international charges or overage minutes. Mobile device management integration increases mobile security. Monthly Optimization right sizes plans to actual usage. Contract audits assure compliance.

Our Communications Lifecycle Management services include...

- | | | |
|------------------------|-------------------------|----------------------|
| • Reporting | • Inventory Management | • Procurement |
| • Usage Management | • Business Intelligence | • BYOD Management |
| • Dispute Management | • Help Desk | • MDM Integration |
| • Audit & Optimization | • Contract Management | • Strategic Sourcing |

We don't believe in a "one-size fits all" approach. Our integrated fixed and mobile solutions are customized to your organizations needs.

WIRELESS MANAGEMENT works seamlessly with all of our other **Integrated Telecom Management** offerings, including: **Audit & Optimization, Asset Management, Procurement, Call Accounting, Invoice Management,** and **Mobile Device Management integration.**

Comview lets you quickly access everything about a mobile device in one place.
